The Macintosh Quadra 700

The Macintosh Quadra 900

**Performance for people who can't wait to do more.**

Introducing the Apple® Macintosh® Quadra™ 700 and 900 computers. If you've been waiting for computers that can speed through even the most demanding business and technical tasks, the waiting is over.

At the heart of their extraordinary performance is the super-fast 68040 microprocessor. Running at 25 MHz, this chip neatly integrates a math coprocessor, memory controller, and cache memory. You'll appreciate this incredible speed and responsiveness when you scroll through a long document, redraw a complex 3-D graphic, or recalculate a spreadsheet.

Both Macintosh Quadra computers have built-in Ethernet that makes it a snap to network them into multivendor environments. They also have built-in video display support for over 16 million colors that lets you work with photo-

quality images—without the expense of adding a video card.

The Macintosh Quadra 700 is perfect if you need maximum performance in a size that fits on your desktop. The Macintosh Quadra 900 is housed in a new floor-standing design with five expansion slots, room for up to four internal disk drives, and a key lock for added security.

Of course, no matter which Macintosh Quadra computer you choose, you'll enjoy Macintosh ease of use, System 7 functionality, and thousands of consistent Macintosh applications—everything you'd expect from a Macintosh.

Visit us today and see the new Macintosh Quadra computers for yourself. We can't wait to show you what they can do for your business.
